

Collaborating with the Atrial Fibrillation NETWORK (AFNET)

In 2010, the Atrial Fibrillation NETWORK (AFNET) founded an association to organize its existing and new members. Thanks to this, the AFNET could successfully continue its work after public funding had expired.

The mission of the AFNET is to create a scientific and clinical value for the treatment of patients suffering from the heart disorder atrial fibrillation and for adjoining cardiovascular topics, such as biomedical basic research, screening, diagnosis, therapy, follow-up care and documentation by connecting research infrastructures as well as clinical treatment structures.

All required * fields, especially name, address and phone number, are only collected to establish and maintain a collaboration and within legal regulations (Article 6 para. 1 lit. f General Data Protection Regulation (GDPR)).

For any further use of your personal data and the collection of additional information, it regularly requires your consent. You can voluntarily give such consent in the following sections. The information voluntarily provided below makes collaborating easier.

I'm interested in working with the Atrial Fibrillation NETWORK with my

private practice

hospital

in a specific trial / in general:

specific trial, if so specify below:

in general

*** required fields**

* name	
* practice / hospital	
* medical specialty	
* address	
* phone	
* e-mail	
fax	
homepage	
comments	

To get an idea/an overview of your **practice/hospital**, we would like to ask you for further information on your medical services, which you can voluntarily give below.

- | | | | |
|--------------------------|-----------------------------------|--------------------------|---|
| <input type="checkbox"/> | Type of practice/hospital: | <input type="checkbox"/> | long-term ECG |
